A few notes about today’s Webinar

• All lines are muted throughout the webinar.
• Please use the Q&A box to ask questions or make comments.
• Today’s Webinar recording and slides will be posted to the PHN website following the presentation. You can find past FOP presentations on our website at https://pediatrichealthnetwork.org/future-of-pediatrics/
Speakers

Amaziah Coleman, MD

Claire Boogaard, MD

Anna Kirkorian, MD

No conflicts to disclose:

• No financial or business interest, arrangement or affiliation that could be perceived as a real or apparent conflict of interest in the subject (content) of their presentation.

• No unapproved or investigational use of any drugs, commercial products or devices.

Children's National Return to School Webinar Series
Dr. Bear Is In: What Do the Tests Really Mean?

On **Friday, July 31, 2020 at 11:30 a.m.**, Children’s National experts will discuss the tests available, how reliable they are, how to interpret the tests and what next steps are after results come back.

Meghan Delaney, D.O., Chief of Pediatric Laboratory Medicine will review the latest information on COVID-19 testing and answer your questions about how testing might play a role in the return to school.

**Register Here:**

Managing ADHD, Anxiety and Depression: A PHN ECHO

PHN in partnership with DC MAP is launching our inaugural Project ECHO® Behavioral Health collaborative on September 2, 2020. During the 6 month project:

• Primary care providers will share cases from their practices to review and discuss with peers and behavioral health specialists.

• Specialists will guide primary care providers through: assessment, treatment and management of ADHD, anxiety and depression. They will also be addressing management and changes to caring for these patients during the pandemic.

• MOC part 4 and CME credit will be offered.

Register online at https://pediatrichealthnetwork.org/project-echo-information-sessions/
Community matters. PHN’s 2020 annual report highlights the network’s commitment to community and the tremendous contributions of our physicians and care teams over the past year. The report summarizes key achievements pertaining to:

- Network growth, leadership and governance
- Quality improvement and information technology
- Network management and finance
- Value-added services, including the vaccine buying group and eCW EHR and data sharing
- COVID-19 response and recovery

COVID Toes and Other Cutaneous Manifestations of COVID-19

A. Yasmine Kirkorian MD
Interim Chief, Division of Dermatology, Children’s National Hospital
Associate Professor of Dermatology & Pediatrics, GW School of Medicine & Health Sciences
Learning Objectives

(1) To identify cutaneous manifestations of COVID-19
(2) To implement treatment or referral for patients with COVID-19 rashes
COVID-19 Background

• Severe acute respiratory distress syndrome-associated coronavirus-2 (SARS-CoV-2) → Coronavirus disease 2019 (COVID-19)
• Initially identified in Wuhan, Hubei, China in December 2019
• WHO declares pandemic in early March 2020
• As of 7/27/2020 --> 16,296,635 cases, 649,662 deaths

PMID: 31978945; https://www.cdc.gov/media/subtopic/images.htm
SARS-CoV-2: Disarming the cell mediated immunity and eventually causing cytokine storm by microthrombi formation, viral load and overactive humoral immunity

NASO-OROPHARYNX

LUNGS
1. Pneumonia
2. Vascular invasion
3. Thrombo-embolism

G.I. SYSTEM
1. Diarrhoea
2. Bloating
3. Pain abdomen

BONE MARROW
1. Suppression of circulating hemopoetic stem cells
2. Lymphopenia

THYMUS
1. Suppression of natural killer cells

SPLEEN
1. Atrophy

LIVER
1. Altered LFT
2. Diffuse mononuclear infiltration

BLOOD VESSELS
1. Microthrombi formation
2. Viremia
3. Generation of AG-AB complexes
4. Vasculopathies

BRAIN
1. Hypoxemic injury
2. Stroke

HEART
1. Myocarditis

SKIN
1. Urticaria
2. Covid toes
3. Livedoid vasculopathy
4. Chicken-pox like rash

KIDNEYS
1. Altered RFT
2. Hematuria

SARS-CoV-2
SUPPRESSION OF CELL MEDIATED IMMUNITY
OVERACTIVATED HUMORAL IMMUNITY & MICROTHROMBI FORMATION

PMID: 32559324
COVID-19 Dermatology Registry (www.aad.org/covidregistry)

716 cases entered from 39 countries

- Morbilliform
- Chilblains/Pernio-like ("COVID Toes") - Healthy patients
- Urticarial
- Macular erythema
- Vesicular
- Papulosquamous
- Retiform purpura - Severely ill, hospitalized patients

PMID: 32622888
What are chilblains?

Chilblains, 1847 (Smith, Elder & Co)

Chilblains, 2020 (Tik Tok)
COVID Specific Rashes
COVID Toes

• Chilblains/Perniosis
• More common in children/young adults
• Convalescent phenomenon
• Usually COVID PCR negative\(^1\)
• **MILD DISEASE**
• Rx: Supportive Care

1. PMID: 32628270
Acral Erythema Pattern
Dactylitis Pattern
Mixed Pattern
Maculopapular Purpuric Pattern
COVID Toes: Pathogenesis

- Immunohistochemistry and electron microscopy with COVID-19 localized to the endothelium
- Inflammatory response similar to that seen in typical perniosis
- NOT the same as acral ischemia noted in severe cases of critically ill COVID-19 patients
Vesiculobullous/Varicella-like Eruption
COVID-O: Livedo reticularis/retiform purpura in COVID-19

PMID: 32588475

PMID: 32283229
Retiform purpura: a sign of microvascular occlusion/thrombosis
C4d & SARS-CoV2 spike glycoprotein in lungs & skin tissue
Non-Specific COVID Rashes
COVID-19 Urticaria and Angioedema

PMID: 32641443

PMCID: PMC7189196
Pityriasis Rosea

- Typically caused by HHV6/7
- Most common in the Spring and Fall
- Herald patch followed by eruption of oval-shaped scaly plaques on Langer’s lines ("Fir tree distribution")
- Inverse PR common in patients of color
Erythema Nodosum
COVID rashes in skin of color:
Why haven’t I shown you any?

Absence of Skin of Colour Images in Publications of COVID-19 Skin Manifestations
COVID-Adjacent Skin Disease
Telogen Effluvium

• TE: synchronized hair shedding that occurs 3 months post a systemic stress (illness, crash diet, psychological stress)
• Increased rates of TE post COVID
• Rx: minoxidil, spironolactone, platelet-rich plasma, time

PMID: 32445237
Dermnz.net
PPE-Induced Skin Eruptions in the era of COVID19

• Healthcare workers presenting with erosions especially on nasal bridge, zygoma from masks
• Treatment: change mask style
  • PAPR? Facial Shield?
  • Duoderm Extra Thin to protect areas of pressure
“Maskne”

- True comedonal/inflammatory acne vs. perioral dermatitis or rosacea occurring under masks

Treatment:
- Use cotton masks
- Avoid makeup under mask
- Sulfur-based facewash
- Topical retinoid if comedonal
- Cleanse/change masks regularly
