Special Announcement:
Pediatric Clinical Trial on COVID-19 and MIS-C

Children’s National is enrolling up to 2,000 children and young adults in a study that will examine the long-term effects of COVID-19 and multisystem inflammatory syndrome in children (MIS-C).

The study is designed to enroll children and young adults under 21 years of age who have a confirmed history of symptomatic or asymptomatic SARS CoV-2 infection or MIS-C. Participants who enroll within 12 weeks of an acute infection will attend study visits every three months for the first six months and then every six months for three years.

Participants who enroll more than 12 weeks after acute infection will attend study visits every six months for three years. The study will also enroll household contacts to serve as a control group, and parents or guardians (1 one parent per participant) will complete targeted questionnaires.

Parents can register their child now.
A few notes about today’s Webinar

• All lines are muted throughout the webinar.
• Please use the Q&A box to ask questions or make comments.
• Today’s Webinar recording and slides will be posted to the PHN website following the presentation.
• You can find past FOP presentations on our website at https://pediatrichealthnetwork.org/future-of-pediatrics/

Nicole Gyimah
Deidre May
Cecilia Graves
Learning Objectives

1. To discuss challenges and barriers families and children with Asthma face.
2. To discuss helpful tips when preparing children with Asthma to return to school.
3. To learn how healthcare providers can help families and children with asthma navigate the healthcare system.
Helpful Tips/Tricks for Clinicians

What each child with Asthma needs to prepare for school:

- Asthma Action Plan
- Spacer and Inhaler (for home and school)
- Refills on medications
- Updated health form/universal health certificate with up-to-date diagnosis
- Follow up appointment in 3-6 months

Questions to consider when discussing Asthma with families:

- How can I prepare my child with asthma for school during COVID?
- Should my child be vaccinated if eligible against COVID-19 because they have Asthma?
- How often should my child follow up with a primary care for Asthma?
- What do other members in our family need to know about my child’s asthma?
- What are common triggers/my child’s triggers?
- What are signs of an asthma exacerbation?
Helpful Resources

Resources for Providers

We value our network of referring physicians and staff and offer resources for medical education and referring patients.

Provider Resources

- What are some provider resources available for asthma care?
  - Asthma Action Plan: English | Spanish
  - Asthma Quick Care Reference

- What is Children’s National doing in the community to promote asthma awareness?
  Read about our community outreach at IMPACT DC.
